Data Sourced from NZAEL bull file

CRV calculated genomic BV's are reported from previous months genomic run. E.g. March 2015 Profit Power report will be February 2015 genomic data

Ranked NZMI – highest to lowest

+/- = Change in index from previous AE run

BV's in bold = Breeding value has changed more than 1 standard deviation from previous AE run = **Significant Change**

CD % red = BV reliability below 85%

CD % green = can be considered for use on maiden heifers (Note: All Jersey are considered options)

Profit Power

Data Sourced from NZAEL bull file

CRV calculated genomic BV's are reported from previous months genomic run. E.g. March 2015 Profit Power report will be February 2015 genomic data

Ranked NZMI – highest to lowest

+/- = Change in index from previous AE run

BV's in bold = Breeding value has changed more than 1 standard deviation from previous AE run = **Significant Change**

CD % **red** = BV reliability **below 85%**

CD % **green** = can be considered for use on maiden heifers (Note: All Jersey are considered options)

Profit Power

Data Sourced from NZAEL bull file

CRV calculated genomic BV's are reported from previous months genomic run. E.g. March 2015 Profit Power report will be February 2015 genomic data

Ranked NZMI – highest to lowest

+/- = Change in index from previous AE run

BV's in bold = Breeding value has changed more than 1 standard deviation from previous AE run = **Significant Change**

CD % red = BV reliability below 85%

CD % green = can be considered for use on maiden heifers (Note: All Jersey are considered options)

Profit Power
